EDUCATION

Arizona State University Aug 2026 – 2029
B.S. in Computer Science, Cybersecurity

VNU-HCM University of Technology 2025 – 2026
Computer Science

- **Talented Engineer Program** in Computer Science; selected among top academic achievers.

PROFESSIONAL TRAINING

pwn.college – Intro to Cybersecurity (Orange Belt) Dec 2025 – Oct 2026

Solved hands-on CTF challenges by *analyzing challenge source code, identifying vulnerabilities, and developing custom scripts* to exploit them and retrieve flags.

- Web Security: SQL injection, command injection, XSS, CSRF, and path traversal.
- Networking: TCP/UDP, ARP, packet sniffing, spoofing, and man-in-the-middle attacks.
- Cryptography: Symmetric encryption, RSA, hashing, and digital signatures.
- Reverse Engineering & Exploitation: x86-64 analysis with GDB, objdump, and pwntools; stack overflows, control-flow hijacking, ASLR/PIE, canaries, and payload development.

Mathematics Tutor Feb 2025 – May 2025

- Tutored **15+ high school students** in derivatives, integrals, spatial geometry, probability, and inequalities.
- Explained core mathematical concepts and guided students in developing problem-solving strategies.
- **Over 90%** of students achieved overall scores of **8.5+/10.**

TECHNICAL PROJECTS

Security & Attack Homelab | *VMware, Network, Web Security, Wazuh SIEM, Automation Script* [Project]

- Built an isolated security lab using Dockerized OWASP Juice Shop to simulate web attacks and investigate security events.
- Performed **network reconnaissance** using Nmap to identify open ports and exposed services; reproduced **SQLi and IDOR** vulnerabilities using Burp Suite; developed **custom Nuclei templates** to automate vulnerability checks; and discover **exposed API** documentation and monitoring endpoints.
- Engineered a **centralized logging pipeline** using an Nginx reverse proxy to capture HTTP request/response metadata and integrate web and system logs with Wazuh SIEM.
- Identified **two detection blind spots** involving User-Agent-dependent rule suppression and SQLi authentication bypasses returning HTTP 200; implemented custom **Wazuh detection rules** to improve visibility into suspicious activity.
- Developed **Python detection validation tools** to execute **15+ control scenarios**, correlate results with Wazuh Indexer alerts via REST API, achieving **over 90% test-outcome agreement**.

Derich Robots | *Arduino, SolidWorks* [Project]

- Led a team in designing and building a robot for ball retrieval, shooting, and flag capture.
- Programmed **Arduino-based** sensor and motor control systems; measured, fabricated, and assembled mechanical components.

Mobile App Projects | *React Native, Java* [Project]

- Developed **mobile applications**, recreating useful features such as calculators and reading tools.

LEADERSHIP & ACHIEVEMENTS

- **Top 20** – CTF University Competition; specialized in Pwn and Reverse Engineering.
- **Finalist** – Central Vietnam Competitive Programming Contest.
- **Team Leader, National Top 20** – Microsoft Imagine Cup Junior; led a team of 5 in developing an AI-powered solution for preserving and promoting regional cultural heritage.
- Making an **inspirational leadership video** about learning through challenges and personal growth.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, Bash.
- **Cybersecurity:** Burp Suite, Nuclei, Nmap, Wazuh SIEM, Wireshark, GDB, pwntools, Binary Ninja.
- **Networking & Infrastructure:** TCP/IP, HTTP, DNS, Linux, Windows, VMware, Docker, Nginx.
- **Development Tools:** Git, React Native.
